

SecureAPlus Pro for Singapore Organisations

Overview of Cyber Essentials

The Cyber Essentials mark is a cybersecurity certification for organisations that have just started out in their cybersecurity journey. It serves to recognise that the organisation has put in place good cyber hygiene practices to protect their operations and their customers against common cyber-attacks.

The product listed here helps organisations to address the measures in the Cyber Essentials mark.¹

Example of measures in Cyber Essentials mark

Secure/Protect

Virus/Malware Protection:

Protect yourself from malicious software like viruses and malware.

How SecureAge product enables organisations to get started in their cybersecurity journey

SecureAPlus keeps your endpoints secure with intuitive application control and anti-malware. Powered by an intelligent AI engine, it offers multiple layers of defence and can be managed by a centralised dashboard.

Used in tandem with various cloud anti-virus scanners for a higher detection rate that is normally not possible with traditional solutions, SecureAPlus protects and informs enterprises of all sizes without interfering with existing systems.

1. Organisations seeking Cyber Essentials certification should complement these products with additional measures to fully meet the certification requirements.

Organisations should refer to CSA's website for more information on Cyber Essentials.
