

SecureAge wins top SME vendor at AiSP Cybersecurity Awards

SecureAge Technologies selected as top small-to-medium enterprise vendor at AiSP's second cybersecurity awards

November 12, 2019 - Today, enterprise data security and encryption provider, [SecureAge Technology](#), announced that it has been named a top SME vendor at the AiSP Cybersecurity Awards. The award gives recognition to enterprises, professionals, and students leading the change in Singapore's cybersecurity space.

The [2019 AiSP Cybersecurity Awards](#) is the second annual run of the program after a successful award campaign in 2018. Winners were announced on November 8th at the Cybersecurity Gala Dinner in Singapore.

The Awards are organised by the [Association of Information Security Professionals \(AiSP\)](#) and supported by [Cyber Security Agency \(CSA\)](#) as well as the following professional and industry associations – Centre for Strategic Cyberspace + International Studies (CSCIS), Cloud Security Alliance (CSA) Singapore Chapter, HTCIA Singapore Chapter, ISACA Singapore Chapter, (ISC)2 Singapore Chapter, itSMF Singapore Chapter, Law Society of Singapore, SCS, SGTech.

“Winning this award is a great honour as the year comes to a close,” said Dr. Teow-Hin Ngair, Founder and CEO, SecureAge. “It’s a testament to the team’s constant pursuit of cybersecurity excellence. It inspires me to continue challenging them in cybersecurity and to explore further ways to grow their expertise and the company as a whole. We look forward to leveraging this win to further our success in 2020.”

SecureAge Technology's AiSP Cybersecurity Award win comes at a time of decisive growth, recently expanding its US presence with a Washington D.C. headquarters and the relaunch of its [SecureAge APEX AI-powered anti-malware solution](#), SecureAPlus for Windows and Android OS. About SecureAge Technology

SecureAge Technology is a rapidly growing data security company that places security and usability on equal footing. Headquartered in Singapore, we are trusted by governments, research institutes, and forward-thinking organizations to protect them from the most advanced and persistent cyber threats in the world. What makes SecureAge different, is we have built a reputation for data-centric and intuitive security solutions that protect data not only when it is stored, but also when it is in use, and in transit. We've achieved this by holding strong reign on our belief that users shouldn't have to become cybersecurity experts to escape data liabilities. Instead, encryption should be inherent, invisible, and instinctive. To protect data when it is most vulnerable, security must take place at the file-level, operate silently in the background, and support the way in which people collaborate. That's why our users can divert their resources to focus on other challenges – SecureAge users enjoy 100% file-level security, every file, every place, and every time.
